FASB Proposes Updates Aimed at Simplifying Accounting for Employee Benefit Plans

[As expected](#), the FASB proposed three

Accounting Standards Updates (ASUs) aimed at simplifying

accounting for employee benefit plans. According to the [AICPA Journal of Accountancy](#), the updates were the result of consensus of FASB's Emerging Issues Task Force. The three proposed ASUs for plan accounting were included in one exposure draft: [Proposed ASU](#), *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): I. Fully Benefit-Responsive Investment Contracts, II. Plan Investment Disclosures, and III. Measurement Date Practical Expedient*.

Those proposals are part of FASB's simplification initiative:

- The first proposal would designate contract value as the only required measure for fully benefit-responsive investment contracts. It would apply to defined contribution pension plans and health and welfare benefit plans that classify investments and fully benefit-responsive investment contracts. A plan would continue to provide disclosures that help users understand the nature and risks of fully benefit-responsive investment contracts.
- The second proposal would require that participant-directed and nonparticipant-directed investments of employee benefit plans be grouped only by general type, eliminating the need to disaggregate the investments in multiple ways. Additionally, the requirement to disclose investments that represent 5 percent or more of net assets available for benefits would be eliminated. For investments measured using the net asset value per share (or its equivalent) expedient in Topic 820, *Fair Value Measurement*, disclosure of that investment's strategy would no longer be required if that investment is in a fund that files a U.S. Department of Labor Form 5500, *Annual Return/Report of Employee Benefit Plan*, as a direct filing entity. This proposal would apply to defined benefit pension plans, defined contribution

pension plans, and health and welfare benefit plans.

- The third proposal also would apply to those three types of plans, providing a practical expedient allowing employers to measure benefit plan assets on a month-end date nearest to the employer's fiscal year end when the fiscal period does not coincide with a month end. Employee benefit plans were excluded from a standard FASB [issued](#) earlier this month allowing this practical expedient for other entities.

Comments are due May 18 on the proposals and can be submitted at FASB's [website](#).
